LOCE Control and  
Environmental  
Laboratory

For more than **50 years**, **SOBEGI's Control and Environmental Laboratory**, has been an essential partner of the companies installed in the Lacq industrial complex for production control, environmental analysis and industrial hygiene.

### INDUSTRIAL HYGIENE

Bringing analytical technologies to the work place

- Control and analysis in working areas

### INDUSTRIAL ANALYSIS

Following all steps of manufacture from raw materials to finished products

- Setting up specifications
- Sampling on production units
- Chemistry of industrial processes
- Routine control of industrial production
- Analysis of deposits, industrial waste water, solvents

### OIL ANALYSIS

Assisting exploration and production teams

- Supervision of tracer injection in oil reservoirs
- Analysis of tracers in waters and gases
- Composition of natural gas and biogas
- Crude oil analysis

### ENVIRONMENTAL ANALYSIS

Helping to optimize industrial performance while respecting environmental constraints

- Aqueous and gaseous waste control
- Analysis of surface, waste, ground water
- Soil and waste analysis

## KEY ADVANTAGES

- Long experience in industrial collaboration
- Adapting our know how to the demands of our clients.
- Availability and Reactivity in order to respect the needs of our clients
- Analysis and sampling carried out in the areas of hygiene and safety
- Production control 7 days a week

### ACCREDITATION AND CERTIFICATION

- Accreditation according to NF/ISO CEI 17025 on a part of the programs 100-1 (waters) and 117 (sulphur dedicated to industrial use), details on [www.cofrac.fr](http://www.cofrac.fr)
- Certification ISO9001/14001
- Our services develop a safety management system based on MASE (Manuel d'Amélioration Sécurité des Entreprises) in order to conform to the requirements of work carried out on a high level SEVESO rated industrial complex

“ Your partner for industrial and environmental challenges ”

### AUDIT AND TRAINING

Sharing skills with companies which are facing up the challenges of safety and quality assurance

- Assisting production control laboratories
- Training of analytical chemists
